SUMMARY

Computer Science graduate (Data Science concentration) from Universitas Lambung Mangkurat with a GPA of 3.64/4.00, seeking to build a career as an AI Engineer. Published a SINTA 2 accredited journal article on deep learning for image classification, and built AI-powered applications that put models to practical use. Combines hands-on experience in research, data preparation, and model integration to turn ideas into working AI solutions. Detail oriented in maintaining data quality, collaborative in team based projects, and a self driven learner who keeps building independent AI projects to grow.

EDUCATION

Universitas Lambung Mangkurat - Bachelor of Computer Science **2022 – 2026**

- GPA: 3.64 / 4.00
- Relavant Coursework: Database System, Artificial Intelligence, Pattern Recognition, Data Mining, Text Mining, Image Processing, Data Science Startup Bussiness
- Achievement: Published Sinta 2 indexed Journal (JESSI) “Evaluating CNN Robustness for Face Mask Classification under Environmental Variations”
- Thesis: Performance Analysis Of ResNet50 and MobileNetV3 Models under Environmental Variations For Multi-Class Face Mask Classification using Transfer Learning

EXPERIENCE

Data Labeling **May 2026**

Universitas Lambung Mangkurat – Freelance

- Annotated an oil palm tree image dataset using AnyLabeling, following classes defined by stakeholders.
- Maintained consistent labeling aligned with data characteristics to ensure dataset quality.
- Reviewed labeled results to minimize classification errors in the dataset used for AI model training.

Mobile Developer **Feb 2025 – May 2025**

BMKG Syamsudin Noor – Internship

- Developed SiBisa, a fullstack inventory and monitoring app, with Flutter for Android and iOS.
- Built the UI/UX and integrated it with APIs (GET, POST, PUT) for data management.
- Applied Flutter widgets, layouts, navigation, Provider state management, and asynchronous operations.

Mobile Development Cohort **Sep 2024 – Dec 2024**

Bangkit Academy led by Google, GoTo, and Traveloka

- Gained expertise in Android application development fundamentals, including UI/UX, data management, networking, and asynchronous programming.
- Contributed as a backend developer for the HairLab capstone project, an innovative app detecting face shapes and recommending hairstyles.
- Responsible for integrating the HairLab application with cloud computing and machine learning APIs, ensuring seamless data communication and optimal functionality.

IT Support **Nov 2023 – Dec 2023**

CV Iqromaya Global Mandiri – Internship

- Creating a Landing Page for South Kalimantan MSMEs for Digital Marketing to Enhance MSME Prosperity.

ORGANIZATION EXPERIENCE

HIMAKOM (Computer Science Student Association) **May 2024 – Dec 2024**

Member – Cadre Division

- Serving as the Head Organizer for the Training Organization event, which provided basic training for the Himakom committee members with a 98% attendance rate.
- Preparing Leadership Training for new students as a means of introducing them to the campus environment.
- Managing Himakom cadres by mapping out each actively participating student to ensure proper organization.

SKILLS

Programming: Java, JavaScript, SQL, Kotlin, Dart, Python
Framework: Flutter, Pandas, NumPy, Scikit-learn TensorFlow/Keras,
Database: MySQL
DevOps & Delivery: Git, GitHub, REST API Integration, Model Deployment & Evaluation
Tools: Visual Studio Code, Android Studio, Jupyter Notebook, Google Colab, RunPod, Postman
Certificates: Introduction to Large Language Models. Python Basic Programming, Junior Office Operator, Flutter for Beginner, Dart Basic Programming, Applied Machine Learning for Android Developer, Introduction to AI, Fundamental Android, Android for Beginner, Cloud Practitioner Essentials (Basic AWS Cloud)
Language: Indonesia, English
Soft Skills: Problem Solving, Teamwork, Communication, Adaptability
